9.2 Translations Homework - Ms. Lumsden's Math Classes

Lesson 9-2 Translations Translations can also be defined without the coordinate plane. For the directed line segment AB, a translation maps point p to point p' so that the following statements are true: • PP is parallel to AB . = AB • PP is in the same direction as AB. The expression (P) describes the translation of a given point P by the

Birdville ISD / Overview

Birdville ISD / Overview

The dashed-line figure is a translation image of the solid-line figure. Write a rule to describe each translation. 8. To start, identify the coordinates of the vertices of both figures. The vertices of the preimage are: A(23, u), B(23, u), and C(1, u). The vertices of the image are: Ar(u, 24), Br(u, 21), and Cr(3, u). The translation rule is 9. 9. 10 ...
