Edexcel B1 - B1.10 revision question sheets covering the first topic of Biology on classification, variation and inheritance. I would recommend you print it out in A3 to allow pupils enough space to write on them.

Classification Variation and Inheritance revision ...

Evolution begins with the inheritance of new genetic variation.Variation describes differences in the genetic make-up between individuals within a species. Variation can exist in all cells of the body, but is only passed on to the next generation when it is present in the gametes.In this way, genetic variation can influence future generations and alter the genetic pool of the population.
