The basic philosophy of PRINCIPLES OF ENVIRONMENTAL GEOCHEMISTRY is to present chemical principles that are essential for understanding environmental problems and then show how these principles can be applied to real-world problems. The latter goal is achieved by including a number of case studies in each

integrates case studies throughout the text to show the application of various geochemical and environmental principles to real-world problems. Broad topic coverage includes extensive materials on the isotopic and mineralogical aspects of environmental issues along with a chapter on the atmosphere.
