Bosch Cp2 Diesel Pump Manual

The manual pump is installed along with the feeder pump and is used to eliminate air bubbles in the diesel system, which is usually known as "diesel system bleeding". The air may "enter" in the system, for example, when the fuel filters change is made, or when the diesel injection pump maintenance is made.

diesel engine. The popularity of the high-speed diesel engine in the passenger car though, would have been impossible without the diesel fuel-injection systems from Bosch. The very high level of precision inherent in the distributor pump means that it is possible to precisely meter extremely small injection quantities to the engine. And thanks ...

Diesel distributor fuel-injection pumps

The high-pressure pump CP4 delivers the fuel into the connected rail under high pressure. The CP4 consists of one or two high-pressure elements, each integrated in a housing with its own camshaft. The pump camshaft is driven by belts, chains, or cogwheels and moves the pump pistons to generate the required high pressure.
