Bridge Inspection - FDOT

This information is then used to determine when the bridge requires maintenance and repair actions. PennDOT uses the combined inspection data from all bridges to plan future repair and replacement projects and to estimate the cost of such projects. When is a bridge closed?

Bridge Safety Inspection FAQs

A team of divers trained in underwater bridge inspection examine parts of the bridge that are underwater. The condition of the major components is then recorded into a statewide bridge database, along with the type and extent of repairs needed, if any. A thorough structural analysis is performed and safe load-carrying capacities are determined.

NCDOT: North Carolina Bridge Information

Miller Maintenance provides routine bridge inspection and maintenance services. Bridge inspections (non-structural) are carried out by qualified staff and reports are prepared that identify minor routine maintenance and repair items to be rectified. In addition, the local area surrounding the bridge is inspected for erosion problems, obstructions to water flow and other general defects.
