Key to ensuring the welfare of individual wildlife casualties is a proven process that enables the rapid euthanasia of animals that are considered unlikely to be able to be released back to the wild, this process is referred to as "triage" (Best & Mullineaux 2003, Molony et al. 2007, Vogelnest 2008). In medical terms, "triage" is usually used to differentiate between the most urgent and less medically concerning cases in an emergency room or at the site of an accident, in order to ...
