subcontinent. Three types of structures are associated with the religious architecture of early Buddhism: monasteries, places to venerate relics, and shrines or prayer halls, which later came to be called temples in some places. The initial function of a stupa was the veneration and safe-guarding of the relics of Gautama Buddha. The earliest surviving example of a stupa is in Sanchi. In accordance with changes in religious practice, stupas

The Buddhist Architecture Essay - PHDessay.com

As Buddhism spread from India to East Asia the existing architectural styles were blended with the stupa to create the pagoda design. Buddhism struck China first, from where it filtered through to Korea and Japan. Therefore, East Asian pagoda architecture is heavily influenced by Chinese design, in particular, the traditional watchtower.
