even more striking.
About 34 species of
butterfly are seen
regularly in Scotland,
but about 1,300
species of moth occur
here. Some moths fly
by day. Look out for
the striking red and
black burnet moth in
grassland with a
variety of flowers,
especially by the sea.

animals (for example, in Britain and Ireland, Blue Tits eat an estimated 50 billion moth caterpillars each year).

Why butterflies matter - Butterfly Conservation

Insects are the largest group of invertebrates and have six legs, two antennae, and three body parts. Some have wings, but not all.

However, if an

invertebrate has wings,
it is definitely an
insect. Some common
examples of insects
are butterflies, beetles,
bees and stick insects.
