The typical manufacturer of a manual vehicle will tell you to change your fluid at around 30,000 to 60,000 miles. Of course, every make and model will likely have a different recommendation, but one that is within this range of miles. In some cases, you might drive your vehicle a lot and constantly put stress on your manual transmission.

How Often to Change Transmission Fluid (Manual and Automatic)

yes I agree with you 100%, but the only way to change the gear ratio is to change the whole transaxle, and even with this it may hurt the car at highway speeds due to the fact that it needs a little lower gearing to help keep the engine in its power range. But there is a couple of things you can do to increase the MPG , that do not cost a lot of money.
