The Carver C-1 continues to be my go to preamp. I've let go of various pres (tube and solid state) because they did not match my modded Carver C-1. Yes, it has been modded to the BillD Mod specs, which I did myself. I guess that's why I love it so much too.

My Carver C-1 review I have been using a TCC 760 phono stage (cost around \$80) with an old Pioneer 1014 av receiver as a sort of preamp with my Hafler xl 280 and acoustat 2+2 speakers. Saw a Carver C-1 in CL for \$90, bought it.

I'm running this with a Carver M1.0t amp and a pair of Polk Audio SDA2a's. The whole system uses Monster cable interconnects. I recently bought a Sony DVD player that runs CD spinning duty. The whole system sounds great and I love it, but I really need to replace the pre-amp; not having a remote or any AV capability is really a drag.

I use both the C-1 and C-19 in seperate rigs. These are the two best Carver made IMO. The C-1 is very neutral and has an excellent phono board. The C-19 I would put up against any pre I've heard except for a Joule Electra that cost five time as much. The guy I bought it from sold it to me to get a Sunfire classic tube pre.

I have a Carver c-6 pre-amp that will be going up for sale soon. I used it in my system for a good 15 years without complaint until recently upgrading to a much more expensive ARC tube pre-amp. They are unique values these days with very good performance. A c-6 in good working order like mine should bring \$150-200 or so.
