Long works from the premise that the major difficulty with the analysis of limited and categorical dependent variables (LCDVs) is the complexity of interpreting nonlinear models, and he provides tools for interpretation that can be widely applied across the different techniques."

## **Regression Models for Categorical and Limited Dependent ...**

"Regression Models for Categorical and Limited Dependent Variables excels at explaining applications of nonlinear regression models... The book provides much practical guidance for the estimation, identification, and validation of models for CLDVs. Each chapter is interspersed with exercises and helpful questions.
