Going up two inches from 6-8" makes a big difference in the field, if the "field" is the sky. With that extra 2" of glass, expect to see more. The Celestron NexStar 8SE is the largest offering in the NexStar SE series. While the 6SE may have the popularity badge, the 8SE brings more to the table.

Celestron NexStar 8SE Review (Is This Telescope Any Good?)

The Celestron NexStar 8SE computerized telescope is one of the most revered telescopes in amateur astronomy. With it's 8" of aperture, it will show you the universe in stunning detail! See thousands of objects, including galaxies, nebulae, star clusters, comets, planets, asteroids, double stars, and more!

Celestron NexStar 8SE Telescope Bundle | Purchase a ...

Celestron NexStar 8SE - At first glance This telescope model is, by all means, futuristic and it would be pretty fair to say that it belongs in Sci-Fi movies more than it belongs in the world of today. Luckily, it's here for all astronomy enthusiasts, beginners, and professionals to use and marvel at the secrets of the universe.

Celestron Nexstar 8SE Review - Odyssey Magazine

The NexStar 8SE of the Celestron product line is the largest telescope that has designed with a fantastic orange-colored tube. It has planned to meet the needs of beginners as well as hobbyists that need gear with reliable power of light-gathering and superb optical quality.

NexStar SE Computerized Telescopes | Celestron ...

The NexStar 8SE is an 8-inch Schmidt-Cassegrain with a focal length of 2,032mm, giving a focal ratio of f/10. All of this fits into a compact orange tube that weighs 11kg and is just 432mm long. The mirror surfaces have Celestron StarBright XLT coatings, which now come as standard, but this wasn't the case with the very first C8s.

Celestron NexStar 8SE Schmidt Cassegrain review ...

The Celestron Nexstar SE range of computerized telescopes has four different models. These are the 4SE, 5SE, 6SE and 8SE. The numbering - 4, 5, 6 or 8 - refers to the size of the aperture of the telescope. So the 4SE has a 4-inch aperture, the 5SE 5 inches etc.

Which Celestron Nexstar Telescope Is Best? [SE & SLT range]

The Celestron NexStar 8SE telescope is the fourth and last in the Celestron NexStar range. This includes four different size Catadioptric telescopes. Catadioptrics collect and work with light through utilizing both mirrors and lenses. This provides you with a long focal length but the telescope can remain compact and can have a short body.

Celestron NexStar 8SE Review [My Experiences With This Scope]

The Celestron 8SE telescope is the largest in the SE range but an 8" aperture telescope is often referred to as the work-horse for amateur astronomers. An aperture that is large enough to see and image many celestial splendours, but still portable enough to carry around, set up easily and store.
