Aqueous Systems 159

SECTION 15.1 WATER AND ITS PROPERTIES

(pages 445–449) This section describes the properties of water in the liquid and solid states and explains how hydrogen bonding affects the surface tension and vapor pressure of water.

PROPERTIES (pages 445-449)

gases. An aqueous solution is water that contains dissolved substances . In a solution, the dissolving medium is the solvent, and the dissolved particles are the solute. A solvent dissolves the solute. The solute becomes dis-persed in the solvent. Solvents and solutes may be gases, liquids, or solids. Recall that
