Fitting Trv Manual Guide

How to Fit a TRV? Let's find out how you change or install a new thermostatic radiator valve in 3 steps: 1. Drain your system and let the air out. Drain down your heating system and allow air into all the radiators, where you plan to install TRV's. Bleed your radiators with a bleed key and a hose. Once the water stops running, you are ready to remove the lockshield valve.

User Manual an explanation for householders

Thermostatic Radiator Valves (TRVs) are fitted to radiators and are used to control the temperature within the room. When used properly, they will significantly reduce the energy used by the heating system by limiting the temperatures within each room, and prevent overheating.

Thermostatic Radiator Valves - Honeywell Home Heating Controls

Nothing too complicated here, a manual valve is probably the most common type of radiator valve and works in a very similar way to a tap. You turn it on to allow the water (central heating) to pass into your radiator and when it has reached the desired temperature, you can turn it off again - hence the name 'Manual Valve'.
