Directed by David Clark, Bayley Silleck. With Michael Douglas, Sterling Nesbitt, Alan H. Turner. This program presents some of the more recent ideas about dinosaurs that are gaining acceptance while following paleontologists searching for fossils over the decades in the Gobi Desert and New Mexico.

### Dinosaurs Alive (2007) - IMDb

Etymology. The word Coelacanth is an adaptation of the Modern Latin Cœlacanthus ("hollow spine"), from the Greek κοιλ-ος (koilos "hollow" + ἄκανθα-α akantha "spine"). It is a common name for the oldest living line of Sarcopterygii, referring to the hollow caudal fin rays of the first fossil specimen described and named by Louis Agassiz in 1839.

### Coelacanth - Wikipedia

Horseshoe crabs are marine and brackish water arthropods of the family Limulidae, suborder Xiphosurida, and order Xiphosura. Their popular name is a misnomer, as they are not true crabs, nor even crustaceans, as crabs are, but a different order of arthropod.. Horseshoe crabs live primarily in and around shallow coastal waters on soft sandy or muddy bottoms.
