At Foundry 39 we make cool stuff - but that's only the beginning. Here's why we do it: I was home visiting my dad in Michigan one weekend a couple of years ago. I was in his kitchen raiding the candy drawer when I noticed a miniature lunch tray on his counter

HOME - Foundry39

Foundry Solutions - Non-Ferrous Metals Metal Casting In metalworking, casting involves pouring liquid metal into a mold, which contains a hollow cavity of the desired shape, and then allowing it to cool and solidify. The solidified part is also known as a casting, which is ejected or broken out of the mold to complete the process.
