Free buffer waits (%) Description. This event occurs mainly when a server process is trying to read a new buffer into the buffer cache but too many buffers are either pinned or dirty and thus unavailable for reuse. The session posts to DBWR then waits for DBWR to create free buffers by writing out dirty buffers to disk.

Free buffer waits (%) - Oracle

free buffer waits . The free buffer waits event has three parameters: file#, block#, and set ID. In Oracle Database 10 g , this wait event falls under the Configuration wait class.Keep the following key thoughts in mind when dealing with the free buffer waits event.. Before a block is read into the buffer cache, an Oracle process must find and get a free buffer for the block.
