### Global Economic History: A Very Short Introduction ...

Very interesting book. At least, if you like reading about how countries industrialized, and the theories on how to effectively do so. Allen does a good job of explaining a rather convincing theory that high wages drove investments in high-capital labor saving devices/methods, which forms a positive feedback cycle, as the high-capital devices allow wages to increase, and so higher-capital ...

'The Industrial Revolution' shows that the period from 1760 to 1850 was a turning point in world history, for it inaugurated the era of sustained economic growth. Technological change was the motor of the Industrial Revolution, but why did it happen in England rather than the Netherlands, France, China or India? Britain's high-wage, cheap-energy economy made it profitable for British firms ...

### 3. The Industrial Revolution - Very Short Introductions

In 1500, the income differences were small, but they have grown dramatically since Columbus reached America. Since then, the interplay between geography, globalization, technological change, and economic policy has determined the wealth and poverty of nations. The industrial revolution was Britain's path breaking response to the challenge of globalization.
