Governing Water Contentious Transnational Politics

It has become a source of contentious politics and social controversy on a global scale, and the management of water conflicts is one of the biggest challenges in the effort to achieve effective global environmental governance. In *Governing Water*, Ken Conca examines political struggles to create a global framework for the governance of water. Threats to the world's rivers, watersheds, and critical freshwater ecosystems have resisted the establishment of effective global agreements through ...

Governing Water: Contentious Transnational Politics and ...

Governing Water: Contentious Transnational Politics and Global Institution Building Ken Conca presents research from his new book: "The core question of the book is 'What's the relationship between this sort of contentious politics, this sort of extra-institutional disruptive politics, and our approaches to global environmental governance?'"

Governing Water: Contentious Transnational Politics and ...

Conca, a political scientist interested in social theory, uses cases of water (mis)management across national boundaries and locally to examine intellectual and institutional efforts to improve such management and reconcile serious social and political conflicts over water, including between those who oppose privatization of local water supplies and those who want natural river flows to be preserved or restored.
