Isolines Part I: For points not ON an isotherm, you should estimate; some of your estimates may be a degree or two different from the ones provided here, which is okay. At the same time, if a point was not ON an isotherm, you should know that its temperature value is not the value of one of the isotherms. Also, your answers should be in C or F;

practice. Hand out the maps and instructions and have your students with a partner (optional) to complete the exercise. You will want to have a few extra maps on hand in case students need to start over. One idea to help your class get started is to project the map on the board and walk them through drawing in the isotherm and isobar lines.
