The Keppe Motor theory proposes that matter works like an antenna, capturing energy from space. The Keppe Motor coil works in natural resonance with this energy of space. Our motor, then, is developed in consideration of the concept of scalar resonance – quite a different process to Newman.

Difference Between Keppe Motor and Newman | KEPPE MOTOR

The Keppe Motor represents the most innovative and efficient motor technology in the world today. Working through the principle of resonance, this technology guarantees maximum efficiency for motors of any power over their entire working range. We can differentiate the Keppe Motor from both conventional AC and DC motors by its unique RC (resonant current) operating waveform.
