## Logic 1 Lecture Notes Philosophy

Lecture Notes - University of Washington Logic is the study of arguments. The goal of logic is to give a theory of which arguments are good and which are bad, and to explain what it is that makes arguments good or bad. Since this is our goal, we ought not understand 'argument' in such a way that an argument has to be any good.

21/04/2011. Logic - is a branch of Philosophy that is concerned with the study of reason. i.e. how humans should reason; not how they actually reason. Philosophy comes from two Greek words *philein* meaning love and *sophia* meaning wisdom. Therefore Philosophy can be said to be the love for wisdom.

Sentential logic(also called propositional logic) is the simplest species of symbolic logic; it is the study of truth-functional statement connectives. Statement connectives are words used to make complex (or molecular) statements out of simpler (atomic) ones. Example English statement connectives: and, or, but, if, only if, unless, not, yet (etc.)
