ns for improving ambulatory education. The studies suggest that education in ambulatory care clinics is characterized by variability, unpredictability, immediacy, and lack of continuity. Learners often see a narrow range of patient problems in a single clinic and experience limited continuity of care. Few cases are discussed with attending physicians and even fewer are examined by them. Case ...

Teaching and learning in ambulatory care settings: a ...

Ambulatory care is a personal health care consultation, treatment or intervention using advanced medical technology or procedures delivered on an outpatient basis (i.e. where the patient's stay at the hospital or clinic, from the time of registration to discharge, occurs on the same calendar day). [1] [2] [3]Many medical investigations and treatments for acute illness and preventive health ...

Ambulatory care

Team Teaching Attending Physician. Team teaching attending physicians oversee inpatient medical care at NYU Langone and educate residents, interns, and medical students during the Core Medicine Clerkship. During inpatient rounds on the wards, inpatient physicians teach team members how to diagnose and treat patients.

Department of Medicine Faculty Teaching Opportunities ...

Unlike teachers in hospital wards, who often focus on only two or three patients during teaching rounds, outpatient teachers must address the concerns of each patient while the patient is still in the clinic, leaving little or no time for more elaborate instruction (typically 1 minute or less per case). 2 Furthermore, teaching about a single well-defined complaint often fails in the ambulatory setting because many problems occur simultaneously, organic findings are intertwined with ...
