Objective In 1998, the Blood Donation Law was enacted in China in response to the outbreak of HIV endemic in central rural China as a result of unhygienic and commercial blood collection. This study aims to provide a first comprehensive review of available data on the prevalence, trend and other epidemiological characteristics of HIV infection among voluntary blood donors since 1998.

Prevalence and trend of HIV infection among voluntary ...

Blood component donations by apheresis has become more common in modern blood transfusion practices. However, apheresis donation still remains less common in China.
