Copper has earned a respected place in the related fields of architecture, building construction, and interior design. From cathedrals to castles and from homes to offices, copper is used for a variety of architectural elements, including roofs, flashings, gutters, downspouts, domes, spires, vaults, wall cladding, and building expansion joints.. The history of copper in architecture can be ...

Copper in architecture - Wikipedia

The design of the exhibition hall should have a strong visual appeal to the audience. Only when the audience will have interest and affinity for the booth, the stainless steel decorative plate will naturally enter the booth to visit, consult and even trade, and the excellent design booth will deepen the audience.

How to put stainless steel decorative panels in the design ...

The GAIA air quality monitoring stations are using high-tech laser particle sensors to measure in real-time PM2.5 pollution, which is one of the most harmful air pollutants. Very easy to set up, they only require a WIFI access point and a USB power supply. Once connected, air pollution levels are reported instantaneously and in real-time on our maps
