each pedigree as ...

And a pedigree is a way of analyzing the inheritance patterns of a trait within a family. And it can be useful to understand more about that trait, maybe to make some insights about the genetics of that trait, and it's a way to think about what's happened in the past in a family, and then maybe we can

Answers
being a carrier but III-3 has almost a 0 chance of being a carrier.

Why? Let's look at the Punnett Squares for X-linked recessive inheritance. In

Pedigree above, II-2 and II-5 are both carriers, their father was affected and passed on his only X chromosome to his daughters.
