Online Library Physics Webassign Answers

Conceptual Example 13 provides useful background for this problem. A playground carousel is free to rotate about its center on frictionless bearings, and air resistance is negligible. The carousel itself (without riders) has a moment of inertia of $125 \text{ kg} \cdot \text{m}^2$. When one person is standing on the carousel at a distance of 1.5 m from the center, the carousel has an angular velocity of 0.6 rad/s ...

Webassign Answers

In general, the answer is no. By default, WebAssign marks an answer either wholly correct or wholly incorrect. If partial credit will be awarded, it is up to the creator of the assignment to set this up. Doing so requires a deeper level of programming than most question writers will undertake.

Physics 1XX Labs: WebAssign

Conceptually, Webassign answers physics is more demanding, and it requires thinking at many levels from students to get the right solutions. Students need to deal with performed experiments to answer theoretical questions alongside coping with various physical quantities.
