Water and wastewater treatment plant operators must have a breadth of knowledge that encompasses more than scientific theory. They need to be generalists with knowledge bridging several scientific, academic, and engineering disciplines. Unfortunately, until now, many of the existing texts in the field were too limited in scope and narrow in focus.

All three reactors at the plant were successfully shut down, but the loss of power caused their cooling systems to fail in the days that followed. By 15 March three explosions had rocked the facility, releasing high levels of radiation. Residents in the surrounding areas were evacuated and plant workers continued to try and cool the reactors.
