During a study on a population of red fox, many of these animals are discovered to live near the groundhog population of the previous question. a) Since foxes may feed on groundhogs, what type of interaction connects these two populations? Predation b) Do the fox and groundhog populations form a community? Explain your answer.

ANSWER KEY Populations and communities

This chapter applies a social justice perspective, largely stemming from Prilleltensky's critical community psychological framework, to improve the relevance and usefulness of research on mixed-status families (Prilleltensky & Nelson, 1997). We discuss the utility of this social justice perspective in theory building, study design and ...
