experience by observing stories and  
listening to the stories of others.

Operating under the assumption that  
human activity and experience are filled  
with "meaning" and stories, rather than  
logical arguments or lawful formulations,  
narrative psychology is the study of how  
human beings construct stories to deal  
with experiences.

## **Narrative psychology - Wikipedia**

Narrative psychology is a perspective or  
focus within psychology, rather than a  
separate discipline. Psychologists  
interested in narrative study how human  
beings create meaning from experiences  
by portraying themselves as  
protagonists in stories.
