A Data Science Case Study with Python: Mercari Price

Prediction. The most effective way to learn is by solving data science related problems. Reading, listening and taking notes is valuable, but once you work through a problem, concepts solidify from abstractions into tools you feel confident using.

A Data Science Case Study with Python:

Development in Python of a machine learning framework emphasizing how algorithms translate into code. Tensorflow examples. Case studies: house price prediction, spam classification, digits identification. The approach to presenting the material includes: Lecture videos with many examples to illustrate the theory
