Arithmetic Mean (Average) The mean of a set of  $n$  numbers is just the sum of the numbers divided by  $n$  (the number of items in the set.). For example, to find the average of 15, 21 and 39, you would simply add the three together and divide by 3. You may be given an average and asked to find a missing number in a set.

### **My College Options - Probability and Statistics**

The correct answer is Choice (A). First, you need to know the number of cards in the shuffled discard pile. If the discard pile contains 8 yellow cards and the probability of choosing a yellow card is 1 out of 4, there must be a total of 32 cards in the discard pile because. is the same as.

### **ACT Practice Math Questions: Probability - dummies**

This means that the answer choices will have a statistically even distribution of 1 in 4 for each answer choice letter (or 1 in 5 on the math section): there is no most common answer on the ACT. So, ultimately, guessing C (or any letter!) will give you the correct answer only a statistical 25% of the

time (20% on the math section).
