### Richard Liboff Quantum Mechanics Solution

Liboff presents a steeper learning curve because it starts with the formalities of quantum mechanics, which is not quite easily understood at the beginning. I recommend using Griffiths as a first textbook, and use Liboff in a second course on quantum mechanics. It is a matter of taste though, as I think some students like postulates and formalities all laid out clearly at the beginning.

Quantum tunnelling falls under the domain of quantum mechanics: the study of what happens at the quantum scale. This process cannot be directly perceived, but much of its understanding is shaped by the microscopic world, which classical mechanics cannot adequately explain. To understand the phenomenon, particles attempting to travel between potential barriers can be compared to a ball trying to ...
