Questions & Answers on Signals and Systems Basics The section contains questions and answers on system and signal classification and its properties, elementary signals and signals operations, discrete time signals, useful signals, circuit applications, periodic and non periodic signals, complex exponential, discrete time systems, impulse function and BIBO stability.

Signals & Systems Questions and Answers - Sanfoundry

Answer: When a signal is sampled and FFT is performed directly then the first side lobe is only 14 dB less than the main lobe i.e. the SNR is very poor. Windowing of sampled signal is done to improve the ratio between main lobe and the first side lobe. Q.7. What should be the condition for the time domain system to be stable and causal both?
