Solution We are to
define the condition
and its cause. Analysis
A fluid in direct contact
with a solid surface
sticks to the surface
and there is no slip.
This is known as the
condition, and it is due
to the viscosity of the

and the weight of a fluid are given. Its mass and density are to be determined.

Analysis Knowing the weight, the mass and the density of the fluid are determined to be

$$W = 225 \text{ N}$$
$$m = \frac{W}{g} = \frac{225 \text{ N}}{9.80 \text{ m/s}^2} = 23.0 \text{ kg}$$
$$\rho = \frac{m}{V} = \frac{23.0 \text{ kg}}{24 \text{ L}} = 0.957 \text{ kg/L}$$
