(a) Dividing the customers of a company according to their gender. ... One solution: For three items, do only the first two comparisons. A

Introduction to Data Mining

A data mining solution can be based either on multidimensional data-that is, an existing cube-or on purely relational data, such as the tables and views in a data warehouse, or on text files, Excel workbooks, or other external data sources. You can create data mining objects within an existing multidimensional database solution.
