Speakers: Speaker Buying Guide - Best Buy

What to look for in an amplifier. Most amplifiers have similar features. The differences come in the amount power it produces, the number of channels it has, the types of connections it offers, how the controls are set up, and whether it has any built-in processing or effects.

Pro Audio Power Amplifiers Buying Guide

When you're matching a power amp to a PA speaker setup, a good rule of thumb is to pick an amplifier that can deliver power equal to twice the speaker's program rating. This means a speaker with a "nominal impedance" of 8 ohms and a program power rating of 350 watts will require an amplifier that can produce 700 watts into an 8-ohm load.
