The Individual Psychology Of Alfred

Alfred Adler's school of individual school of psychology created a chasm in the field of psychology, which had been dominated by Freud's psychoanalysis. While Freud focused on only the internal processes — mainly sexual conflicts — that affect a person's psychology, Adler was adamant that to fully understand a person, a psychologist must also consider other internal factors as well as external factors.

...

Individual psychology, body of theories of the Austrian psychiatrist Alfred Adler, who held that the main motives of human thought and behaviour are individual man's striving for superiority and power, partly in compensation for his feeling of inferiority. Every individual, in this view, is unique, and his personality structure—including his unique goal and ways of striving for it—finds expression in his style of life, this life-style being the product of his own creativity.
