investigates quadratic functions.

Students study the structure of expressions and write expressions in equivalent forms. They solve quadratic equations by inspection, by completing the square, by factoring, and by using the Quadratic Formula. Some quadratic equations will have complex solutions.

**Unit 5: Quadratic Functions - Troup  
County**

The graph of a quadratic function is a parabola. The axis of symmetry of a parabola is a vertical line that divides the parabola into two congruent halves. The axis of symmetry always passes through the vertex of the parabola. The  $x$ -coordinate of the vertex is the equation
