Information technology has entered our lives over a relatively brief period of time with little warning and essentially no formal educational preparation for most people. Many who currently use information technology have only a limited understanding of the tools they use and a (probably correct) belief that they are underutilizing them.

Being Fluent with Information Technology

Important: Information technology is bringing about the fusion of several important industries dealing with computers, telephones, televisions, and various handheld devices. Computer Programmable, multiuse machine that accepts data—raw facts and figures—and processes (manipulates) it into useful information, such as summaries and totals.
